Real stories, real lives, supporting empowerment in a new innovative accessible way. Our project's real-life stories are accessible here. Enjoy the inspirational stories where ever you are.

Learning from Lived Experience are unique and powerful. It refers to a representation of the experiences and choices of a given individual, and the knowledge that they gain from these experiences and choices. Readers and listeners experience personal stories about specific topics related to a variety of human and everyday challenges. The goal includes opening dialogue to promote a better understanding of different experiences.

Learning, overcoming, growing.
